

This app is a leisure app. We know that protecting your privacy is our top priority, and we are committed to the responsible management, use and protection of personal information.

This Privacy Policy (this "policy") regulates how we collect, use, store and share your information in order to obtain and use our services. By using or accessing our applications or our services, you agree to the privacy policy listed below.

What information do we collect?

Equipment information

We collect your device and network connection information for analysis only when you use our application. This information includes your equipment brand, equipment model, network status, etc. The device information we collect does not contain any user sensitive information, such as device ID or any information that can be used to permanently identify users or devices.

Information collected by the SDK of third-party advertising partners

Some third-party advertising realization SDKs integrated in our applications may access your information for advertising optimization purposes. Such information includes language, region, location information, IP address, etc. This policy does not apply to our third-party advertising partners because they have their own privacy policy and you can view it on their website. We have no right to access or control the information collected by such third parties. However, we will follow the existing process to scan all third-party SDKs to detect whether they collect sensitive user information. The third-party partners we choose to cooperate with include but are not limited to today's headlines, guangdiantong, Facebook, Google, etc.

Information collected by third-party analysis tools

Our application integrates SDKs from multiple analysis service providers to achieve application optimization. These third-party SDKs may collect your information, such as language, region, location information and IP address. This policy does not apply to our third-party analysis tools. You can find their privacy policy on their website. The partners we choose to cooperate with include but are not limited to talkingdata and Youmeng. The information they provide us is aggregated analytical data, and there is no personal privacy information.

How do we use this information?

Provision of services

We may use your information so that our application can provide you with services or functions. For example, we may access the album camera on your phone to save the pictures you have drawn.

Improve our products

As mentioned above, we collect your information for analysis purposes. This analysis data is only applicable to application optimization. Some third- party advertising partners may use the information they collect to optimize the advertising experience. Their use of information is subject to their privacy policy and we cannot access any such information they collect.

How is your information stored?

For the information we collect, some information is only stored locally on your device, and some information is securely stored in encrypted format in our server at AWS. We have strict policies to control the access and use of such data.

How do you share your information?

We will never share your information with third parties. All the information we collect is only used to optimize our products and is securely stored in our servers in encrypted format. This information will not be disclosed to any third party.

Children' s privacy

This app will not collect personal information of children under the age of 14. If you are under the age of 14, please do not try to use our products or send us any information about yourself, including but not limited to your name, address, telephone number or email address. To use our applications or services, you need to be at least 12 years old, and we recommend that minors aged 12 or above obtain their parents' permission before sending any information about themselves to anyone on the Internet.

Policy change

Any information we collect is subject to this privacy policy. However, we may modify this policy according to the actual situation. If we make changes to our privacy policy, we will choose whether to provide you with update notification according to the specific situation. If you continue to use our

applications or services after policy changes, you will mean that you accept these changes.

Protection measures for personal information

We have always attached great importance to protecting the security of users' personal information. Therefore, we have adopted protective measures such as security technical measures and organizational and management measures in line with industry standards to minimize the risk of your information being leaked, damaged, misused, unauthorized access, unauthorized disclosure and change. include:

Technical measures for data security

(1) In terms of data security collection, confirm the legitimacy, legitimacy and necessity of data collection through personal information security impact assessment, identify and inform users in a clear and accurate way to obtain consent, and log the user's authorization and consent to collection; Use sensitive identification tools to classify and classify the collected user data, and set different levels of security policies for different levels of data; Adopt technical measures to identify the source of the collected or generated data to ensure the accuracy and non repudiation of the data source;

(2) In terms of data security transmission, use secure channels to transmit personal information, and conduct secure encryption and desensitization through appropriate encryption algorithms to ensure the confidentiality and integrity of personal information in the process of data transmission;

(3) In terms of data security storage, the data classification and classification management system is adopted, and different information storage strategies are adopted for the data classification and classification results; Personal sensitive information needs to be encrypted and stored to ensure that the data security use specification can be implemented in place; Strengthen authority control and security audit for the database storing personal information; Regularly backup and restore personal information to ensure the integrity of personal information in the process of storage and use;

(4) In terms of data security processing, desensitize personal information according to the use scenarios and security requirements. For example, desensitization processing needs to be completed at the server before the front -end displays personal sensitive information; It is forbidden to use real user information in the development and testing environment; Implement a strict data authority control mechanism and take technical measures such as multiple identity authentication and network / data isolation to ensure that the

behavior of processing personal information can be effectively monitored to avoid illegal access and unauthorized use of data;

(5) In terms of data security destruction, the minimum availability period of personal information storage is set according to the requirements of laws and

regulations and the actual business needs, and the expired data is processed through secure deletion technology to ensure that the destroyed data cannot be recovered. Technical means include but are not limited to data thorough removal scheme, disk destruction, physical destruction, etc;

(6) Establish a complete audit mechanism to monitor and audit the whole process of the data life cycle, so as to prevent your personal information from unauthorized access, public disclosure, use, modification, artificial or accidental damage or loss;

(7) Other measures to achieve data security protection.

(8) In terms of face data processing security, we only collect the facial photos uploaded by users to synthesize the looks of future children. After the synthesis is completed, the uploaded face data will be automatically cleared and will not be saved on the server.
